Committed to adopting the best fast charging protocol compliant with Indian standards for your fast charging requirements.

SWAP

FOR SPONTANEOUS DETOURS

Effortlessly swap in seconds for uninterrupted driving freedom

GridX Home Charger

0.3C Charge at Home

Convenient and Aesthetic

LED SOC indicator

Power anything and everything.

With B2L capabilities, users can not just power their EVs, but also dock it with their home power backup systems. We believe losing critical appliances like the internet routers, computers, and phone charges during power outages shouldn't be a 2024 problem.

GridX Swap Nest

3.3 KVA battery dispenser

Fully Automated **Swap** process

Tamper Proof

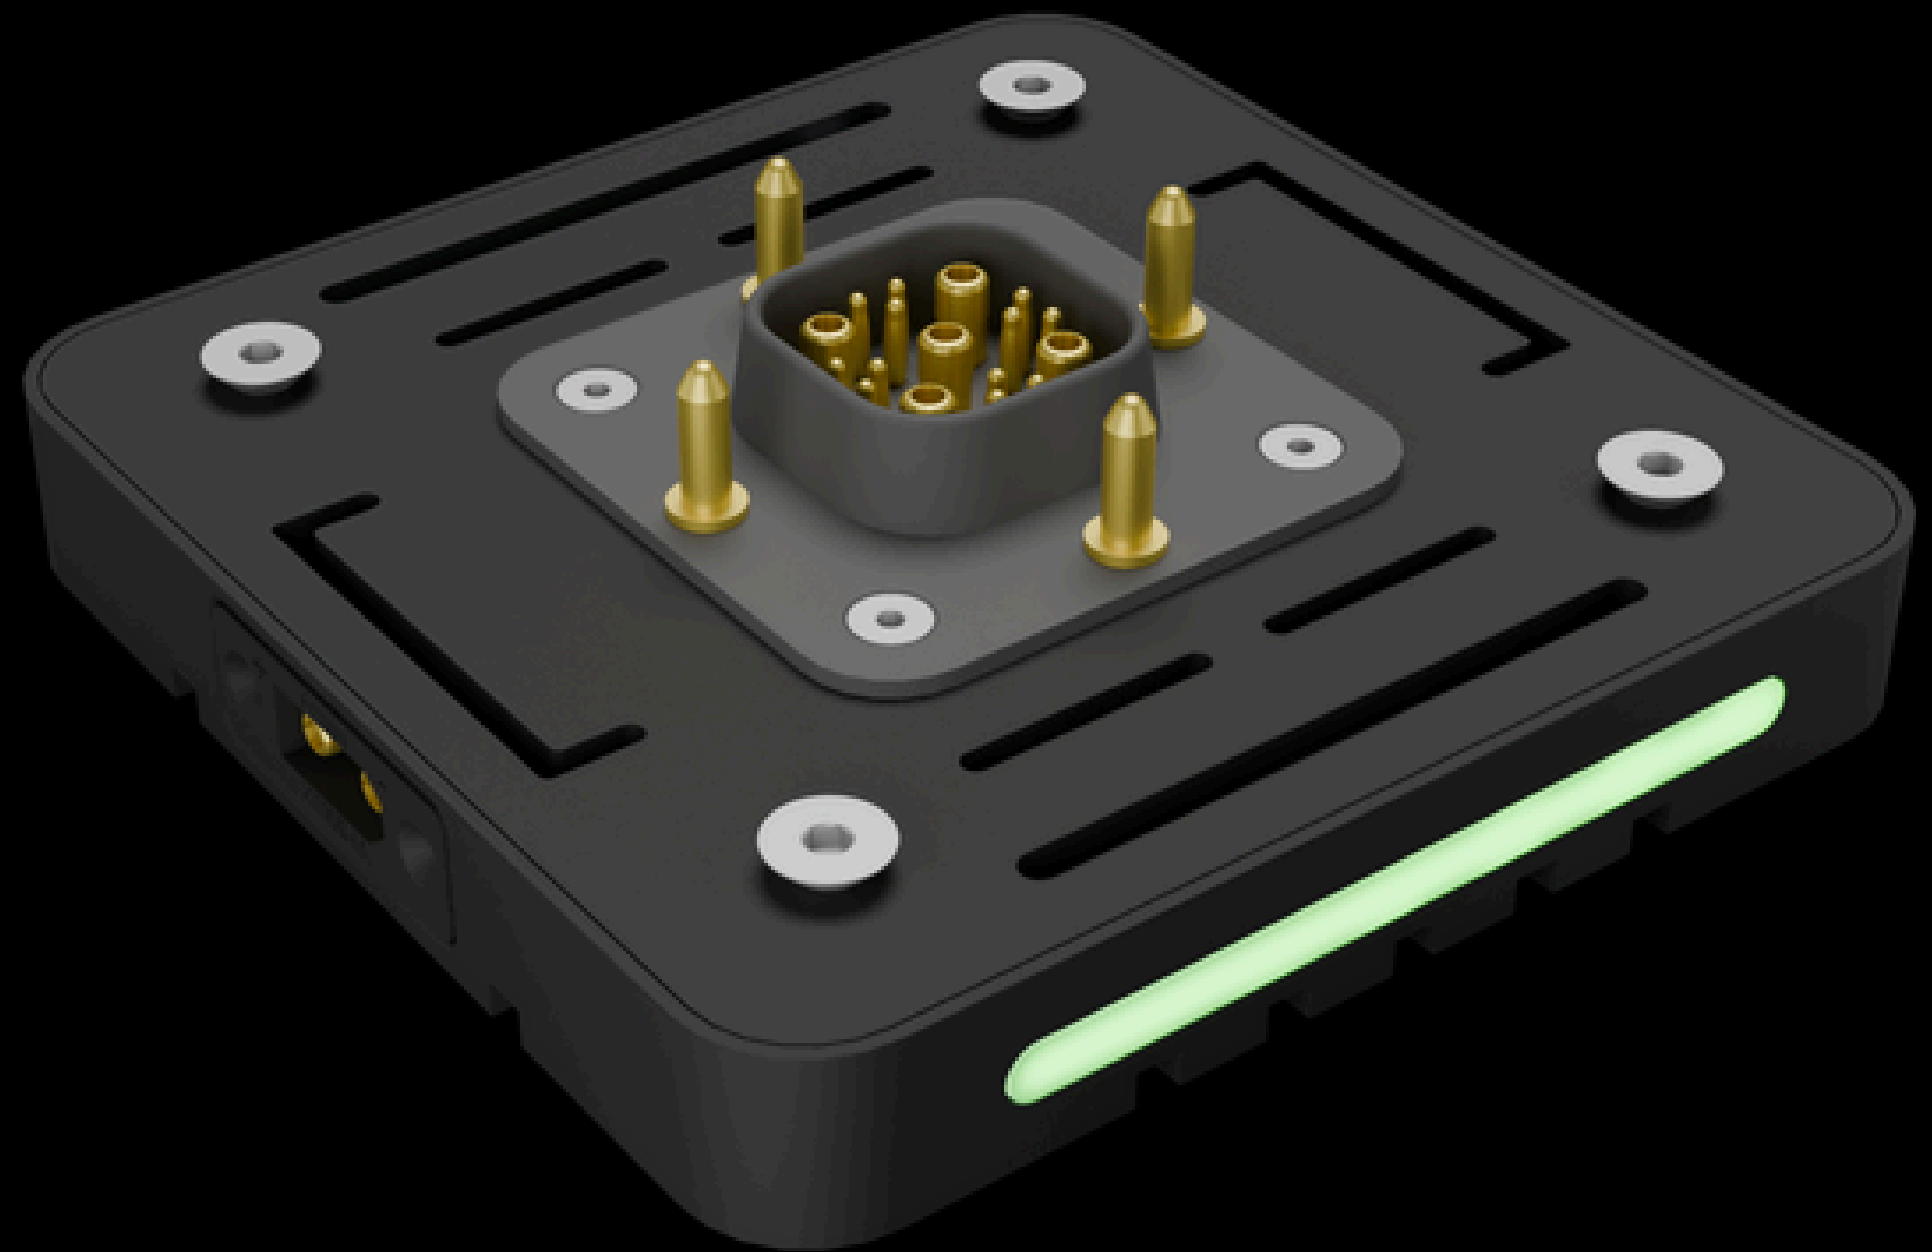

GridX PAC

Modular Design

EV, Storage & Solar use cases

CAN Enabled for communications

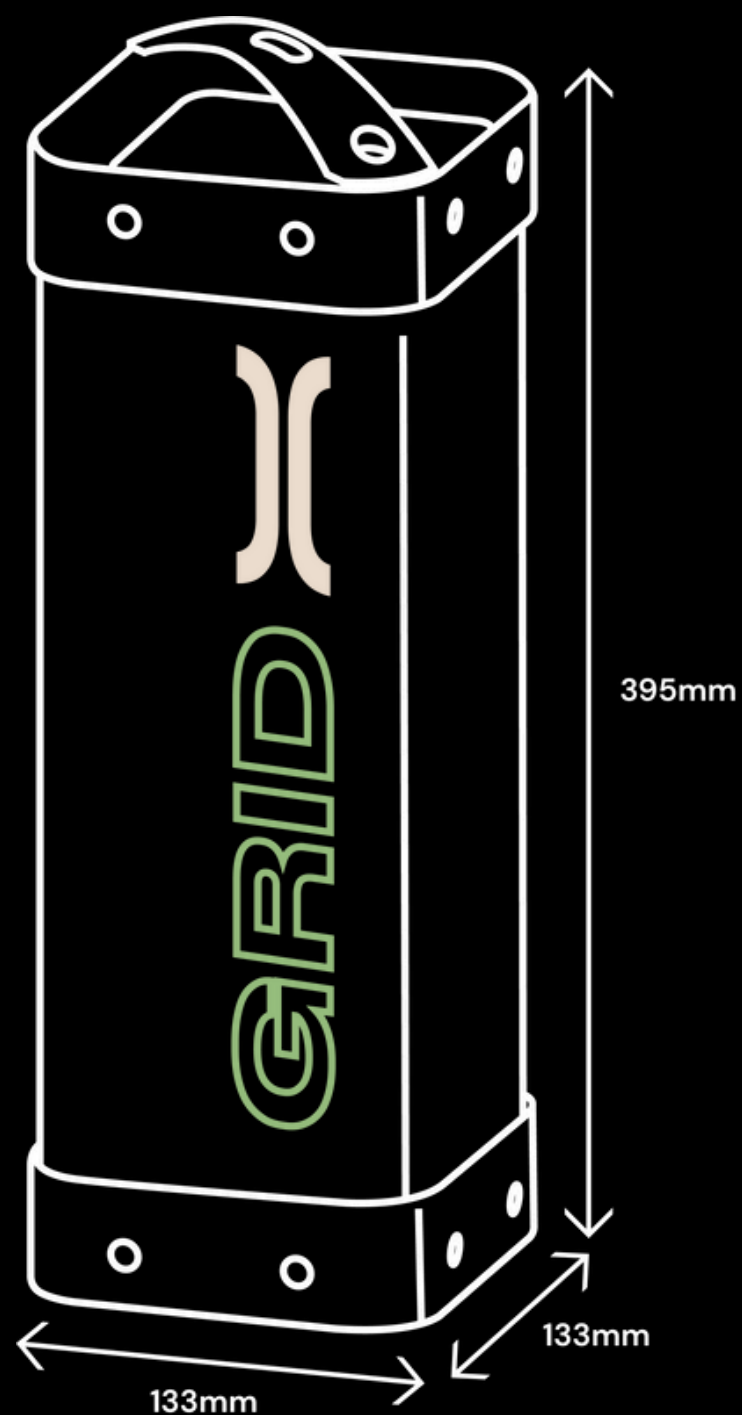

Latching Battery Lock

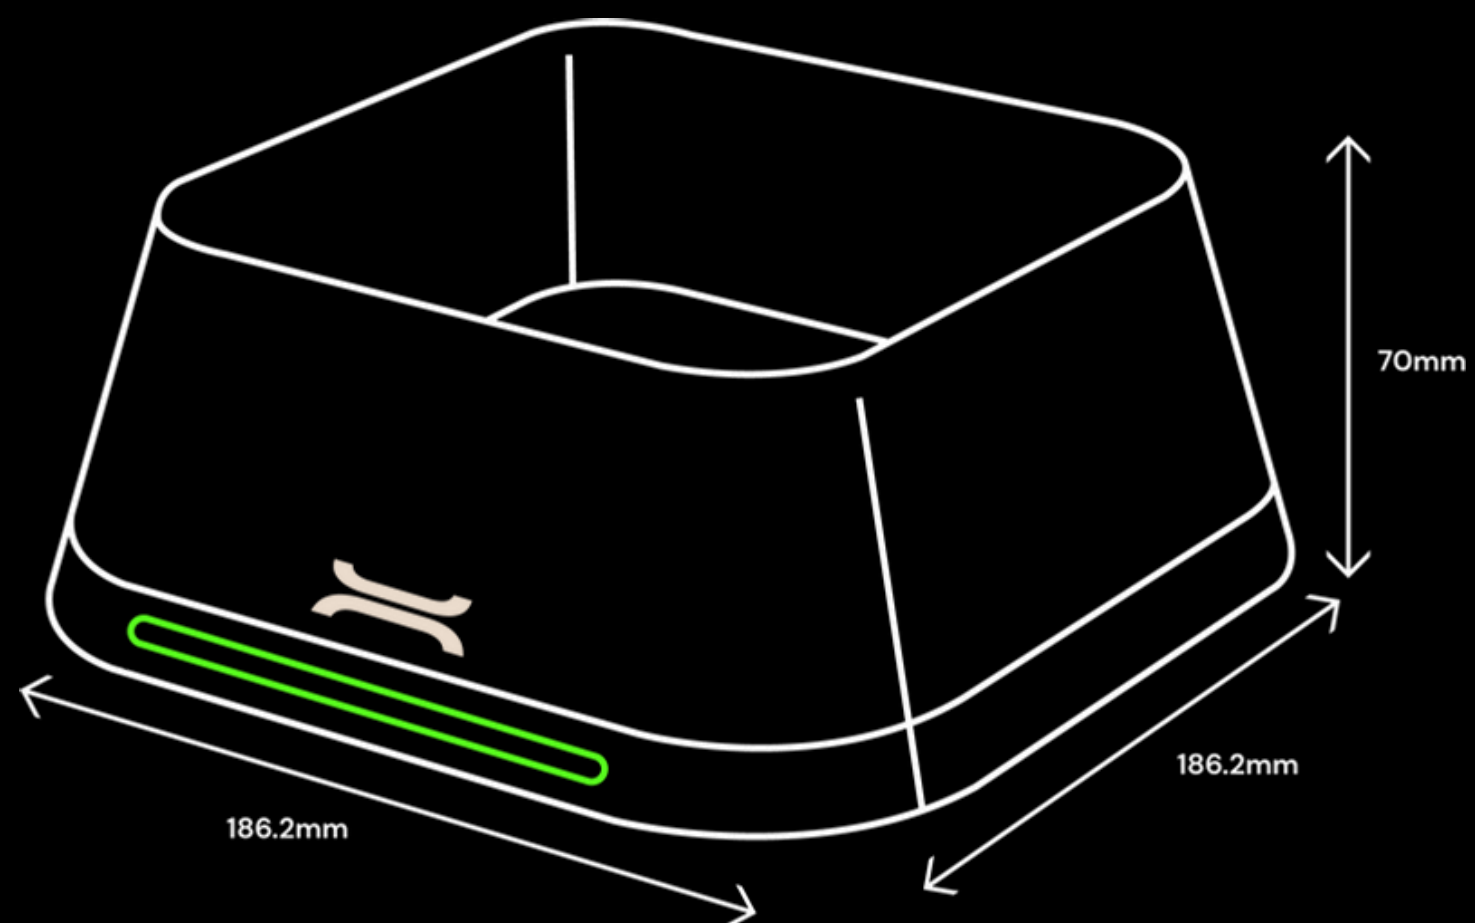

PAC is required for Battery and asset identification and integrates necessary safety functions. It is modularly integrated into both the EV dock and home dock. OEMs can use this as a reference design and build their custom designs around it.
